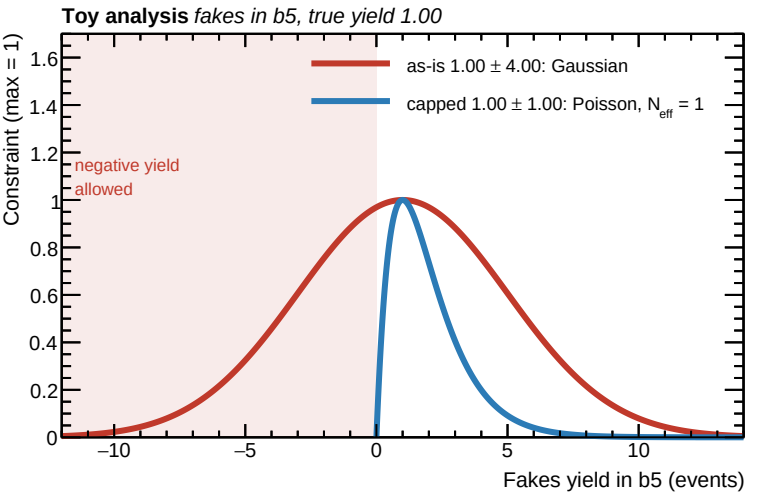
autoMCStats how many MC events is a yield worth?
10%: 100 events
< 1 event:
Poisson not viable
50%: 4 events
100%: 1 event
400%: 0.06 events
Effective MC events N_eff = 1 / (rel. err)^2
Relative MC error (error / yield)



Toy analysis fakes in b5, true yield 1.00
as-is 1.00 ± 4.00: Gaussian
capped 1.00 ± 1.00: Poisson, N_eff = 1
negative yield
allowed
Constraint (max = 1)
Fakes yield in b5 (events)
